EdgePress September 2026 update

September 24, 2026 · By toewpq

On this page

1. Editable page layouts

2. Shared site components

3. Plugins and backend requests

4. Live preview and review report

This is the first requested release update for September 2026.

Editable page layouts

Pages now use an outside-in layout model. Set a row's column count, add one cell for each column, choose elements, and place content in that page's localized Markdown front matter. Posts continue to use Markdown rendering.

New elements pair images or captioned video with text, and provide display typography styles. Theme stylesheets are updated to support the new layout model.

Shared site components

All pages use the selected theme's shared head, navigation, and footer partials. The same layout generates localized content for each page. Component visibility, navigation labels, and footer copy are configured in config.yml. Theme selection uses edgepress-theme-selector.

Plugins and backend requests

The guides now cover consent-gated tracking, statistics, advertising, and human-verification providers, alongside the new layout model. The proxy can forward /api/v1/* requests through a Service Binding or an HTTPS URL and a Worker secret. The backend must still validate and authorize every request.

EdgePress September 2026 update: request 2

September 25, 2026 · By toewpq

On this page

1. [Mobile layouts and language selection](#)

2. [Markdown guide and local article search](#)

3. [Accessible content report](#)

This is the second requested EdgePress update for September 2026.

Mobile layouts and language selection

Themes now keep long article content, tables, code blocks, navigation, and page elements within narrow screens, the measured document width with the viewport. The header's language links are now a compact, keyboard-oper selected language.

Markdown guide and local article search

The first post is now a bilingual, rendered guide to EdgePress posts and the supported CommonMark and GFM sy markers, tables, code, links, images, sanitized inline HTML, and unsupported extensions. The report checks those i

Visitors can search article titles and full post text using the generated local search index. Search runs in the brows

Accessible content report

The report now includes individual post results and screenshots for posts and pages. Its HTML uses headings, lan descriptions, and a tagged PDF with a document outline when the installed browser supports it. Mobile viewport and document widths appear beside each screenshot.

EdgePress September 2026 update: request 3

September 25, 2026 · By toewpq

On this page

1. [Install EdgePress from npm](#)

2. [Install or create themes](#)

3. [Deploy from GitHub or upload static files](#)

This is the third requested EdgePress update for September 2026.

Install EdgePress from npm

EdgePress is published as the `edgepress` package. Start a site by installing the package, initializing an empty folder, then opening the local preview:

```
npm install edgepress
edgepress init
npm install
edgepress server
```

The initializer keeps an existing `package.json` name and scripts, then adds the EdgePress commands and runtime.

Install or create themes

Install a theme package with `edgepress theme install <npm-package>[@version]`. EdgePress copies the theme into `themes/` and skips package install scripts. Switch among installed themes with `edgepress theme list` and `edgepress theme use <name>`.

EdgePress September 2026 update: request 4

September 25, 2026 · By toewpq

On this page

1. [Keep the audit report in one PDF](#)

2. [Remove the templates directory](#)

3. [Cloudflare Workers Builds setup](#)

This is the fourth requested EdgePress update for September 2026.

Keep the audit report in one PDF

edgepress check and edgepress server now persist only tools/page-check.pdf. Desktop and mobile screenshots and screenshot files are removed after generation.

Remove the templates directory

edgepress init now writes its generated README and .gitignore directly from the CLI package. The source and directory.

Cloudflare Workers Builds setup

The quick-start guide records the repository settings: root directory /, build command npm run build, deploy command npm run deploy. It also explains that a build stuck at Initializing build environment has not run the project build integration or replace a stale Cloudflare build API token before retrying.

Wrangler requires compatibility_date for this Worker, so the project pins it to the first day of the month: 2026-09-01.

EdgePress September 2026 update: request 5

September 25, 2026 · By toewpq

On this page

1. [Clarify Cloudflare one-click deployment](#)

This is the fifth requested EdgePress update for September 2026.

Clarify Cloudflare one-click deployment

The README and bilingual quick-start guides now explain that Cloudflare's Deploy button creates a new GitHub repository and unused names for both during setup. The button does not connect to or update an existing Worker; use the existing repository to publish updates.

The release notes and project compatibility history are updated as version 2026.9.5.

EdgePress September 2026 update: request 6

September 25, 2026 · By toewpq

On this page

1. [Navigation and article reading](#)

2. [Code blocks and small screens](#)

3. [Theme palettes](#)

4. [A clearer visual identity and reading path](#)

This is the sixth requested EdgePress update for September 2026.

Navigation and article reading

The shared navigation now includes a localized Posts link to the article archive. Markdown post pages generate a

Code blocks and small screens

Generated code blocks now have an accessible copy button. Theme styles wrap long command lines so the full code is visible without horizontal dragging. The theme development guide describes the shared behavior.

The project compatibility history is updated to version 2026.9.6.

Theme palettes

The bundled themes have refreshed, higher-contrast palettes.

A clearer visual identity and reading path

The site now shares a local set of 23 SVG icons across theme navigation and feature cards. A page-changed project mark, folded paper, narrow mascot, and Open

EdgePress September 2026 update: request 7

September 26, 2026 · By toewpq

On this page

- [1. Consent and privacy disclosures](#)
- [2. Images and article lists](#)
- [3. Mobile controls and maintenance](#)

This is the seventh requested EdgePress update for September 2026.

Consent and privacy disclosures

Cloudflare Web Analytics is configured as a statistics service and remains behind the visitor's explicit consent. Browser cookies are used for analytics. See `plugins.consents` in `config.yml`. The privacy policy lists each enabled service's provider, category, purpose, and retention.

Images and article lists

The homepage uses smaller responsive mascot images. Article archives are sorted newest-first across all available languages. Post excerpts now remove Markdown syntax before display.

Mobile controls and maintenance

The consent panel has a responsive mobile layout, clearer service details, and larger touch targets. The unused interface for retired audit files have been removed.

EdgePress and Markdown: a complete writing guide

September 23, 2026 · By toewpq

On this page

- 1. [Headings and paragraphs](#)
- 2. [Setext heading level two](#)
- 3. [A level-three heading](#)
- 4. [A level-four heading](#)
- 5. [A level-five heading](#)
- 6. [A level-six heading](#)
- 7. [Emphasis, code, and characters](#)
- 8. [Links and images](#)
- 9. [Lists, including nested combinations](#)
- 10. [Tables and more GFM](#)
- 11. [Safe inline HTML and supported limits](#)
- 12. [Writing posts in EdgePress](#)

EdgePress keeps **pages** and **posts** deliberately different. Pages use ordered, editable element blocks from their M renderer, so this article is also a working reference: every example below is rendered from a real post.

The post renderer uses CommonMark with GitHub Flavored Markdown (GFM), then sanitizes the generated HTML. Inline syntax can be combined inside paragraphs, list items, quotes, and table cells.

EdgePress 2026 年 9 月更新

2026年9月24日 · 作者: toewpq

文章目录

1. 可编辑页面布局

2. 共享站点组件

3. 插件与后端请求

4. 实时预览与审核报告

这是 2026 年 9 月针对本次需求的第一次更新。

可编辑页面布局

页面现在采用由外向内的布局模式：先设置每行栏数，为每栏添加一个单元格，再在单元格内选择元素类型，并在该语言页面继续使用 Markdown 渲染。

新增的元素支持图片或带字幕的视频搭配文字，以及多种艺术字样式。颜色和视觉表现由主题样式表负责。

共享站点组件

所有页面都复用所选主题的 head、导航和页脚局部模板。相同布局也会生成本地化 403 和 404 页面。站点元数据、组件显示。使用 edgepress theme 切换主题。

插件与后端请求

开发指南现已涵盖遵循同意设置的跟踪、统计、广告、人机验证服务，以及可信构建插件。通用 Worker 代理可以通过 `ServiceWorker/` 请求。后端仍需验证每项请求并执行授权。

3. [无障碍报告](#)

主题现在会让较长的文章内容、表格、代码块、导航和页面元素适应窄屏幕。审核工具会捕获移动视图，并比较页面文档宽度和高度。审核工具还可以使用键盘操作，并在切换语言时前往当前页面的对应语言版本。

第一篇文章现为双语指南，逐项展示 EdgePress 文章支持的 CommonMark 和 GFM 语法。内容包括嵌套列表与引用、任务列表、表格、代码块、HTML，以及未启用的扩展。报告会检查两种语言页面的实际渲染结果。

访客可以使用本地生成的搜索索引查询文章标题和全文。搜索在浏览器中运行，只会匹配文章。

报告现在逐篇列出文章结果，并附上文章与页面截图。报告 HTML 使用标题、页面地标、有表头的表格、可跳转章节和图片 PDF。每张移动截图旁会列出视口与页面文档宽度。

运行 `edgepress check` 可构建网站、查看报告、检查 Markdown 语法结果和响应式截图。

二六、 $\frac{4}{5}x - \frac{1}{2}(x-1) = 7$ A.A.mmmmm

EdgePress 2026 年 9 月更新：第 3 次需求

2026年9月25日 · 作者: toewpq

文章目录

1. 从 npm 安装 EdgePress

2. 安装或创建主题

3. 从 GitHub 部署或上传静态文件

这是 EdgePress 在 2026 年 9 月针对第 3 次需求的更新。

从 npm 安装 EdgePress

EdgePress 已发布为 edgepress 包。安装包后，在空目录中初始化项目，再安装生成的网站依赖并启动本地预览：

```
npm install edgepress
edgepress init
npm install
edgepress server
```

初始化器会保留现有 package.json 中的项目名称和脚本，并补入 EdgePress 命令与运行依赖。

安装或创建主题

使用 edgepress theme install <npm-package>[@version] 安装 npm 主题包。EdgePress 会将主题复制到 themes/，且不会运行包的安装脚本。使用 edgepress theme list 查看已安装主题，再用 edgepress theme use <name> 切换。

可选服务

关闭设置

请选择允许加载的可选服务。保存或接受之前，不会启用任何服务。

EdgePress 2026 年 9 月更新：第 4 次需求

2026年9月25日 · 作者: toewpq

文章目录

1. 审核报告只保留 PDF

2. 移除 templates 目录

3. Cloudflare Workers Builds 设置

这是 EdgePress 在 2026 年 9 月针对第 4 次需求的更新。

审核报告只保留 PDF

edgepress check 和 edgepress server 现在只在 tools/page-check.pdf 保存报告。桌面和移动端截图会嵌入 PDF，此

移除 templates 目录

edgepress init 现在由 CLI 包直接写入新项目的 README 和 .gitignore。源码与 npm 包不再包含 templates/ 目录。

Cloudflare Workers Builds 设置

快速入门指南现已记录本仓库设置：根目录 /、构建命令 npm run build、部署命令 npx wrangler deploy，且无需配置 Initializing build environment，表示项目构建命令还未运行；应重新连接 GitHub 集成，或替换失效的 Cloudflare 凭据。

Wrangler 要求此 Worker 设置 compatibility_date，因此项目将其固定为本月第一天：2026-09-01。

EdgePress 2026 年 9 月更新：第 6 次需求

2026年9月25日 · 作者：toewpq

文章目录

1. [导航和文章阅读](#)

2. [代码块和小屏显示](#)

3. [主题配色](#)

4. [更清晰的视觉识别与阅读路径](#)

这是 EdgePress 在 2026 年 9 月针对第 6 次需求的更新。

导航和文章阅读

全站导航新增本地化的文章入口，指向文章归档页。Markdown 文章页会根据标题生成可跳转的目录。

代码块和小屏显示

生成的代码块新增无障碍复制按钮。主题样式会自动折行显示较长命令，窄屏下无需左右拖动即可阅读完整内容。主题开发项目兼容性历史已更新至 2026.9.6。

主题配色

内置主题已换成对比度更清晰、视觉更鲜明的新配色。

更清晰的视觉识别与阅读路径

网站现在使用一组本地 22 枚 SVG 图标，为主导航和功能卡片提供一致的图形语言。页面式项目图标、折页纸鸟吉祥物和 OG 分享图让首页与链接预览拥有统一的识别形象。

EdgePress 与 Markdown：完整写作指南

2026年9月23日 · 作者：toewpq

文章目录

1. 标题与段落

2. Setext 二级标题示例

3. 三级标题示例

4. 四级标题示例

5. 五级标题示例

6. 六级标题示例

7. 强调、代码与字符

8. 链接与图片

9. 列表与嵌套组合

10. 表格与其他 GFM 语法

11. 安全行内 HTML 与支持范围

12. 在 EdgePress 中写文章

EdgePress 对 **pages** (页面) 和 **posts** (文章) 采用不同的编辑方式。页面在 Markdown 前置资料中配置有序、可编辑的，就是一篇实际渲染的文章，可作为语法参考。

文章渲染器使用 CommonMark 与 GitHub Flavored Markdown (GFM)，随后会清理生成的 HTML。块级内容之间留一格单元格中。

标题与段落

Markdown 有六级标题。文章页面的 <h1> 已由前置资料中的标题生成；正文使用 ## 到 #####，让页面始终只有一个明确的 <h1>。

What this starter site does

This source build contains public pages, posts, search data, a sitemap, and an Atom feed. It does not include a visitor account system, comments, or a contact form.

The Worker exposes an optional `/api/v1/` proxy for a backend. It forwards requests only when the deployer configures a Service Binding or `BACKEND_URL` together with the `BACKEND_TOKEN` secret. This starter site does not submit page content to that API.

Hosting and delivery providers may process connection and request data to operate the site. The operator must identify the providers and describe their applicable terms and retention before publication.

Optional services

This list is regenerated on each deployment. It is not a contract. Services are listed in `config.yml` under the `optional` section. Each entry includes a provider, category, purpose, and retention.

Statistics • cloudflare-web-analytics

Purpose: Measure site visits and page-load performance after consent.

Retention: Unsampled beacon data is kept for 7 days, then aggregated to about 10% for long-term storage. Dashboard history is available for 6 months.

此起始站点当前的功能

此源项目生成公开页面、文章、搜索数据、站点地图和 Atom 订阅。它不包含访客账户系统、评论功能或联系表单。

Worker 提供可选的 /api/v1/ 后端代理。只有部署者配置 Service Binding，或同时设置 BACKEND_URL 和 BACKEND_TOKEN 密钥后，代理才会转发请求。此起始站点不会将页面内容提交到该接口。

托管和内容分发服务商可能为运行网站而处理连接和请求数据。运营者应在发布前确认实际服务商，说明适用条款和数据保留期限。

可选浏览器服务

Scope and limits

- Accessibility checks inspect generated HTML and CSS. They do not measure color contrast, screen-reader behavior, keyboard interactions in a browser, or dynamic vendor widgets.

- Agent-friendliness checks inspect metadata, structured data, internal links, robots.txt, sitemap.xml, and llms.txt. They do not guarantee crawler indexing or answer quality.
- This automated report is not a legal-compliance assessment or a substitute for manual review.
- Screenshots capture generated local pages at desktop and mobile viewports. They do not replace manual keyboard, zoom, contrast, or assistive-technology review.

EdgePress local PDF report. Screenshot details are included as evidence and may be small when printed.
